Abstract Music is blanket transmitted (for example, via satellite downlink transmission) to each customer's user station where selected music files are recorded. Customers preselect from a list of available music in advance using an interactive screen selector, and pay only for music that they choose to playback for their enjoyment. An antipiracy ""ID tag"" is woven into the recorded music so that any illegal copies therefrom may be traced to the purchase transaction. Music is transmitted on a fixed schedule or through an active scheduling process that monitors music requests from all or a subset of satellite receivers and adjust scheduling according to demand for various CD's. Receivers store selections that are likely to be preferred by a specific customer. In those instances where weather conditions, motion of atmospheric layers or dish obstructions result in data loss, the system downloads the next transmission of the requested CD and uses both transmissions to produce a ""good copy"". In conjunction with the blanket transmission of more popular music, an automated CD manufacturing facility may be provided to manufacture CD's that are not frequently requested and distribute them by ground transportation.

Patent Right	Application number	090101479
Change	Licensing	No
	Mortgage	No

Transfer	Yes
Succession	No
Trust	No
Opposition	No
Invalidation	No
Cessation	
Revocation	
Issue date of patent right	20070411
Patent grant date	20210119
Maintenance fee due	20100410
Years of maintenance paid	003
